9. EXPOSURE ASSESSMENT Introduction and uses

9 EXPOSURE ASSESSMENT Introduction and uses Bis (2-ethylhexyl) phthalate (DEHP) is produced outside of the EU and the applicant directly imports the stop-off formulation which contains 5% w/w DEHP The only use for which the applicant is applying for The aero engine fan blades are manufactured from three sheets of titanium

Overview of Mitsubishi Services

The engine's timing belt drives the camshaft (s) ("top end") from the rotation of the crankshaft ("bottom end") The belt keeps the piston and valves in "time" during operation Serious internal engine damage can occur when the piston and valves come into contact with each other "out-of-time" caused by a damaged belt etc
